

GOOD ROOTSTOCK
FOR HEAVY CLAY

Rootpac® R

Plum x almond hybrid rootstock

'PAC 941' (USPP# 21,556)
(*Prunus cerasifera* x *Prunus dulcis*)

- Productive rootstock, tolerant of heavy clay / water logged soils
- Use with most almonds (including Nonpareil), peaches, nectarines, plums and some apricots
- Somewhat vigorous, open growth habit
- Has very good anchorage
- Highly Resistant to Root Knot nematodes
- Lightly susceptible to Lesion nematodes (same as Nemaguard)
- Resistant to Phytophthora root rot
- Tolerant of higher pH soils
- Somewhat tolerant of high salts
- Tolerant to Asphyxia (similar to Mariana 26-24)
- Likely tolerant of Oak Root Fungus, still under evaluation

8 month old Shasta® on Rootpac®R

7th leaf Nonpareil on Rootpac®R
