

GUARDIAN®

Brand BY520-9
(Prunus persica) Peach seedling

“My trees on Guardian® do just as well without fumigation as my trees on Nemaguard with fumigation”

“I have nematode infested ground and Guardian® root is the only thing I can get to survive & perform in my sandy, bacterial canker ground”

— Rick Van Ryn, almond grower, Escalon, CA

“I love the growth on Guardian® - it's like Nemaguard on steroids”

— Kevin Fondse, almond grower, Ripon, CA

Rick Van Ryn with his 9 month old almonds on Guardian® **NOT FUMIGATED!!**

- Use with almonds, peaches, nectarines, plums, prunes and apricots.
- Resistant to **Bacterial Canker** and **Bacterial Blast**.
- Resistant to **Ring** and **Root Knot** Nematodes.
- Vigorous, uniform growth.
- A good choice of rootstock when planting back an old orchard site.
- Burchell Nursery is exclusive licensee in the Western US.
- Has been around for over 20 years.

More satisfied growers

Scott Viss with his 9 month old Shasta® on Guardian®

Gene Painchaud with his 2nd leaf almonds on Guardian®

5th leaf almonds on Guardian®

“I’m very happy with my Guardian® Rootstock, I got 12.5 tons to the acre on my 2nd leaf Kingsburg(pp#11,739) clings on Guardian®. They have more vigor than Nemaguard and appear more resistant to phytophthora than Viking. Guardian® survived in bacterial canker ground in a bacterial canker year (2017). They look gorgeous!”

— Mark Cederlind, peach grower, Turlock, CA

“I like Guardian® root. It’s been very uniform in growth; Beautiful trees; nice, healthy, strong trees; very happy with Guardian®.”

— Peter Martini, almond grower, Escalon, CA

“My trees on Guardian® grow just as well without fumigation as the Nemaguard with fumigation. I’ve been planting my trees on Guardian® without fumigation for the last 5 years. I don’t want anything but Guardian® root.”

— Rick Van Ryn, almond grower, Escalon, CA
